

# CANS Education

## Lean Construction Courses

Is your business keen to improve efficiency and profits? Implementing Lean Construction principles could help strengthen your bottom line! With this trio of courses from CANS Education, you can fast-track your understanding and adoption of Lean Construction in 2022.

1. **A Subcontractors Guide to Lean Construction** - Feb 16 & 17, 2022
2. **Implementing Lean Construction** - March 2 & 3, 2022
3. **Last Planner® System: Why it Works and How to Ensure Success** - March 7 & 8, 2022

### Why Would I Want to Go Lean?

Learn about the benefits of Lean in Issue 1 of Construction Pulse Magazine. [Click here to read 'Lean Construction: Everything you need to know to do more with less'](#).

### Questions?

For more information, or assistance registering for these courses, please contact Kaitlyn Bennett, Education & Training Lead at [kbennett@cans.ns.ca](mailto:kbennett@cans.ns.ca).

### Your Facilitator

Jim Johnston, P. Eng., is an industrial engineer, a member of the Lean Construction Institute – Canada, and an accredited trainer with the Associated General Contractors of America. With over 20 years of experience, Jim is a construction, operations and quality specialist focusing on business process analysis and improvement, lean thinking and implementation, strategic planning and business development. He has worked extensively as a management consultant and trainer, leading organizations through lean transformations, quality system implementation/auditing and process optimization projects. Jim has facilitated the implementation of lean construction on many projects and is currently involved in the continued development of the Lean Construction Institute - Canada.
