

Become a role model with Techsploration and inspire young women in grades 9 through 12 to explore exciting careers in STEM and Skilled Trades. If you're interested in participating please contact [margaret.davidson@techsploration.ca](mailto:margaret.davidson@techsploration.ca)

## *Ways to be a role model:*

### *School Team Role Model*

As a Techsploration team role model, we ask you to commit approximately four days of your time over the winter and spring months. A team of 6-8 young women will visit your workplace and conduct interviews with you and other women in your company. The team will then stage a presentation on what they've learned at their school event "Techsploration Goes to School" where you and other role models are invited to connect with students. You'll also be invited to our two-day, year-end "Techsplorer Event" where you will network with students from schools across the province.

### *Guest Role Model*

A "Techsploration Goes to School" guest role model is a two-hour commitment (excluding travel time), where you'll participate in a round-robin session at a Techsploration school. You will arrive at the event with your "tools of the trade", and speed-network with small groups of students for eight minutes at a time. During this time you can impress the importance of math and science, as well as showcase your portfolio and even provide an interactive demo, if you wish.

## *Important Dates:*

<b>Techsploration Goes to School</b>	March and April (on-going)
<b>Techsplorer Event • Division A • Halifax</b>	<b>May 5 &amp; 6, 2022</b>
